Most of you can probably remember the great times you had on a scooter growing up. Today, however, the skateboard revolution has practically forced the ol' scooter into obscurity. Well now, MCS introduces a brand new innovation that will set the skateboard back in time.

TRIK STIK & SCOOT STIK can turn any skateboard into a mini-scooter. So now a new generation can experience the practicality that a scooter provides without sacrificing the fun of skateboarding. Each STIK is constructed of lightweight chrome plated steel and can be mounted quick & easily onto any board, using existing truck screws. Plus, it can be taken off just as readily as it went on. Use temporarily for an exciting change of pace or keep it on permanently - the choice is yours.

Both STIKS come in three different sizes for your different sized customers. For daring tricks and stunts, the TRIK STIK has a hinged platform for free-style capabilities. Those looking for a more versatile means of transportation may prefer the SCOOT STIK, which rides like a skateboard and steers like a scooter.

Ask us about new TRIK STIK & SCOOT STIK today. It's a whole new fun sensation!
